Appointment of Robert Delage as General Manager

The Board of Directors of the BCMMB is pleased to announce the appointment of Robert Delage as our new General Manager.

Robert has served as Senior Director of Finance and Operations for the past 16 years at the BCMMB. His early accomplishments included the successful implementation of Board policies and procedures for milk pick up, processor billing, and producer pay when the Board took on those responsibilities from industry. Robert also chairs the National IT Aggregation Steering Committee, is president of the Central Agricultural Facility, and serves on various regional and national committees including CMSMC and several Western Milk Pool Committees.

Robert is a Chartered Professional Accountant (CPA) and sits on the Surrey, Langley, North Delta Chapter Board for CPA BC. He has held several volunteer Board and coaching positions for local community sports associations.

Robert's strong analytical, finance, and operational skills have helped the Board to develop many policies over the past 16 years, including the establishment of our route-based transportation system, implementation of CDQ, and the National Ingredients Strategy. His administrative, HR, and IT skills have long been assets to the Board.

Robert's open communication style will undoubtedly complement the Board's priority to strengthen stakeholder communications and foster a spirit of cooperation in the BC dairy industry. Perhaps most often overlooked are his effective leadership and problem-solving skills, which have helped to establish a strong team environment at the BC Milk Marketing Board.

Robert is enthusiastically looking forward to this new challenge in his career, and the Board and staff wish him every success in his new position.
