Vancouver Island Milk Transportation – Notification of contract termination

The BC Milk Marketing Board is responsible for the pickup from farms and delivery to processing plants of raw milk produced in the province of BC. In January 2017, the BCMMB and Agrifoods International Cooperative (Agrifoods) secured a hauling agreement to continue transportation services on Vancouver Island. Agrifoods have now given the Board one year's notice to terminate the agreement effective March 31, 2019. The BCMMB have always been very pleased with the services of Agrifoods on Vancouver Island and appreciate their services over the last many years.

The Board will be requesting proposals from qualified transporters to provide these services throughout Vancouver Island. Only transporters with the necessary expertise and capabilities to perform the work will be pre-qualified by the Board and invited to participate in the Request for Proposal process. Details of the Request for Proposal process will be unrolled over the next few weeks.
